August 2022 ~ March 2023

Yangon Academy International School
Office Assistant

Responsibilities include handling calls, guiding visitors, and ringing the bell on schedule. Ensure student safety by checking rooms, assist teachers with document copies, and track paper and stationery usage in Excel. Additional tasks include translating documents, supporting events, selling uniforms, and capturing event photos for social media.

March 2023 ~ Present

Zote By Focus Innovation
Junior Full Stack Developer (React.js & Laravel)

I am a full-stack developer specializing in React.js and Laravel. I build responsive UI components with CoreUI, ensuring UX best practices, and use SCSS for maintainable styling. I integrate CRUD APIs, develop image upload features for certificate generation, and manage cloud storage with AWS S3. On the backend, I work with Laravel MVC, handling complex sales logic (transactions, discounts, bonuses, FOCs) and implementing Excel import/export for reports. I also designed and built a complete lucky draw system from database to UI. I efficiently manage version control with Git, create and merge branches systematically, and work in an Agile Scrum environment, hosting sprint meetings every two weeks.
